Opening in a Good Way

Learning Lab

- The Workshop/Learning Lab approach will offer a hands-on approach to a different area of the Strat Pak tool every few weeks.
- These sessions will be interactive, encouraging brainstorming, discussion and problem-solving in real time.

Defining Sustainability

Sustainability is the capacity of a community to determine ***what is working well***, and produce and maintain positive program outcomes over time.

Sustainability planning needs to begin on day one and ***depends on the participation, resolve, and dedication of diverse community partners.***

Group Exercise

- Please take a minute and reflect on a practice, activity, event, or something you (and/or with others) have initiated/experienced on a regular basis for over a year, 5 years, or 10 years and you continue to participate in? This could be something physical, mental, cultural, spiritual, social, etc.
- And if willing, share with the whole group and list several reasons why or how you sustained it?

Questions We Usually Ask

What will our community need to sustain in order to experience the benefits of our project over time?

Once we know what we need to sustain, how can we make it happen?

What are the keys to sustainability success?

Questions We Usually Ask

With so many pieces to consider, what will it take to develop a sustainability plan for our community?

What do we need to sustain?

What are some approaches to sustainability?
